Breadth Physical Science (BPS) Requirement for Students in Elementary Education Majors

All students in any Elementary Education major are required to take this course to fulfill their BPS General Studies Requirement:

**PHYS 1200 - Introduction to Physics by Hands-on Exploration (BPS).**

Students who transfer to USU from other institutions or who come with an Associate’s Degree should see their advisor to determine if any course already on their transcript can fulfill this requirement in lieu of PHYS 1200.
